

## DT360-NVR Module Features

- Multi Server Video Surveillance Solution: Providing an unlimited video recording for 360 and 180 IP Cameras [Also compatible with USB Cameras] in Local RAID system or remote Network Attached Storage
- PSIA and ONVIF Compliant
- Multi Resolution Support: Each Camera can be independently recorded in different resolution.
- Multi Compression Support: Supports existing and new compression methods such as MJPEG, H264, MPEG4.
- Dual Video Transmission: Each 360 Video Stream can be transmitted at two remote locations simultaneously with two different video resolution and CODEC.
- Virtual PTZ Encoding: To convert each 360/180 video stream into standard PelcoD PTXZ Camera with configurable video format and resolution
- Image Enhancement: Multi Level Antialiasing Filter
- Intelligent Cycling Recording Functions
- Automatic Video Backup on NAS
- Universal Time Stamping
- Tamperproof Encrypted Recording Data
- Frame Rate management: Each Camera FPS can be adjusted independently for recording, live and transmission
- Easy Image Camera Setup
- On Screen Information: All the status information regarding the NVR including CPU usage, Temp, Hard Drive Status, Network Status are available.
- Watchdog feature

## DT360-BackOffice Module Features

- Instant Playback: All recorded videos can be accessed and navigate in full 360
- Multiple Screen Configurations: Single, Dual, Quad, Wide and Panoramic navigable windows for each camera for recorded videos.
- Video Bookmarking
- Multi Level Security Access
- Easy Search of Recorded Videos with Location, Date and Time
- Video List Display with respective timeline
- Multiple control: Keyboard, Mouse, Joystick and Touch Screen Control
- 360 degree Video Overlay Function
- Sequential Playback of the videos listed by search.
- Video Playback Speed Control
- Time Stamping display
- User Friendly Graphic Interface
- 360 Video Extraction in Native Format, 360 Video Player required
- 360 Video to Video Pal Extraction: Video readable through any market player such as VLC or a basic DVD Player.
- Snapshot of a bookmarked event can be saved as a JPEG image
- Evidence Printing feature with incident detail, reporter name, timestamp, panoramic view and detailed view
- Tamperproof Tracking Information [TTI]

## DT360-Live Module Features

- Multiple Screen Configurations: Single, Dual, Quad, Wide and Panoramic navigable windows for each camera in Real-time
- Digital Zoom Capabilities
- Virtual PTZ Control
- Multi Level Security Access
- Autorotation: Simulates a standard swirl camera in a 180 or 360 Video Stream
- Multiple control: Keyboard, Mouse, Joystick and Touch Screen Control

## DT360-NVR

"The Optimum Solution for Asset Protection"

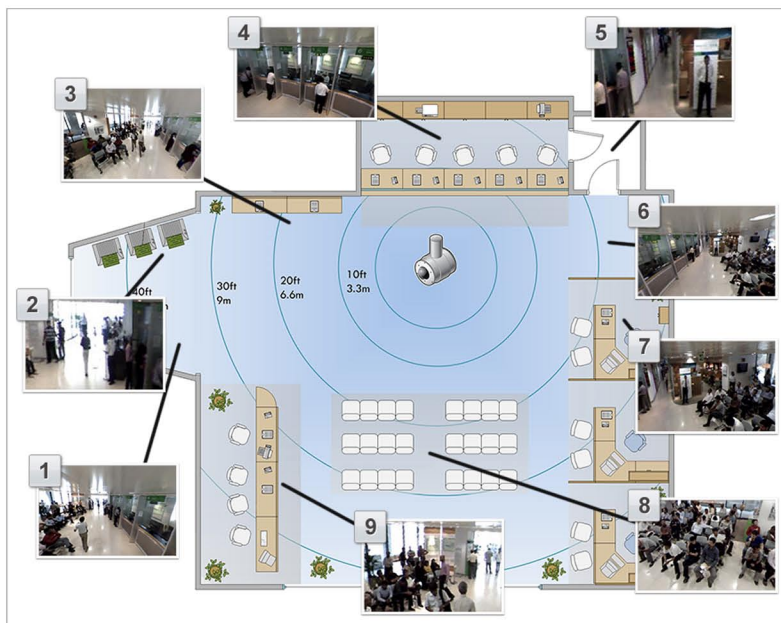

Banks are experiencing the benefits of a single camera capturing every angle.

The 360 degree video solutions offered by DOO Technologies include integrating the 360 degree video camera with existing pan, tilt and zoom cameras delivering a complete 360 degree video sphere where the operator can zoom into specific areas within the video sphere.

As well as transmitting live 360 degree video images the video data is also recorded in a 360 degree video file for future evaluation.

## Nine areas monitored live and recorded in full 360 degree video by just ONE STATIC camera.

## ALL SOLUTIONS BY INDUSTRY

- **Commercial:** Banks, Hotels and Malls
- **Government:** Homeland Security, Surveillance and Robotics
- **Military:** Air, Land and Sea
